	Area	Key	A	B	C	Customer X Fit	Why?	Single Org Scoring	Multi Org Scoring	Single Org Weighting A	Single Org Weighting B	Single Org Weighting C	Single Org Weighting Notes	Multi Org Weighting A	Multi Org Weighting B	Multi Org Weighting C	Multi Org Weighting Notes
Culture	Business - Collaboration	Which best describes your Chatter communication requirements between different multiple units or departments?	Chatter communication between Business Units or Departments are not required or encouraged	Chatter communication between various Business Units is encouraged and a nice-to-have for conversational purposes.	Chatter communication is essential to the business and partners at a record account level for cross-selling/marketing	C		5	1	poor	good	perfect		perfect	good	poor	Implementation requires a custom solution to share posts between orgs
Business	Business - Collaboration	Which best describes your organizational structure, if it is multiple business units or departments?	Organization is separated by different Business Unit Leads with no reporting structure between these units. Each business unit is independently owned and operated.	Organization has separate Business Units but roll-up to a single corporate lead organization. Each business unit does have some amount of autonomy but will take standards input from Corporate.	Organization is either a Single Business Unit or has a COE/Governance model whereby all other Business Units follow and implement the best practices	B		3	3	less acceptable	acceptable	perfect	If politics is the only reason, then this should be re-considered. If each business unit requires its own innovation, then Multi Org is better.	perfect	acceptable	good	
Culture	Business - Collaboration	Which best describes your governance model, if you have multiple business units or departments?	There is no Organization Governance Model currently in place, but looking to create one	There is a Governance Model in place to loosely determine standards, but Business Units are still free to create their own standards	There is a COE that dictates standards, change management, release management, and a strong governance model	A		2	4	less acceptable	good	perfect		good	acceptable	less acceptable	Multiple Orgs makes it very hard to maintain a centralized governance model
Business	Business - Collaboration	Which best describes your business units need to share data?	There is currently no desire to share data amongst the Business Units or Departments as they are siloed		Business would like to share all standard data across business units, such as, Accounts, Contacts, etc. to foster cross-selling and cross-marketing	C		5	2	less acceptable		perfect		perfect		less acceptable	Use of S2S can facilitate sharing of data for multiple orgs, but is limited in nature and requires manual/custom effort
Business	Business - Collaboration	Which best describes your needs to distribute solutions to partners or franchisees?	There is no need to collaborate with partners or franchisees.	Some degree of collaboration required.	High degree of collaboration required.	A		2	3	less acceptable	acceptable	perfect		acceptable	less acceptable	poor	If multiple orgs, then each partner might have an individual community to login to. It will require data sharing and SSO to make it feel like a single marketplace.
Business	Business - Process	Which best describes the sharing model across the businesses and processes?				C		3	4	good		acceptable	Different business processes can still be housed in a single org, but requires more work to agree upon standard fields and processes as well as maintain record types and page layouts	acceptable		good	
Business	Business - Reporting & Dashbo	Describe the needs for a complete roll-up of reports/dashboards across the enterprise				C		5	2	less acceptable	acceptable	perfect		perfect	acceptable	less acceptable	Requires an external Data Warehouse to extract data from multiple orgs and generate the reports needed
Business	Business - Reporting & Dashbo	Do the business leaders in your lines of business measure your business distinctly?	No need for a global/corporate roll-up of reporting or metrics	Some reporting and dashboards would be required at a global level.	A great deal of global reporting required	C		3	5	perfect		acceptable	Will need to ensure proper roll-ups across divisions so as to distinguish clearly	acceptable		perfect	
Support	Business - Support Organizati	Do you have a single support organization for SFDC projects? Or are you considering to have a single organization?	No	Occasionally	Yes	C		5	1	poor		perfect		perfect		poor	Multiple logins, processes, data, etc. increases staff, training, and maintenance costs
Business	Business - Support Organizati	Is one group able to move faster and more likely to change? (Time to Market)	Regions have their own support centres		Global Support Centre	C		2	5	perfect	acceptable	less acceptable	An additional org may need to be created for those Bus that need to innovate.	less acceptable	acceptable	perfect	Additional Orgs allow for innovative Bus to move at their own pace
Support	Organizational - Change Man	Are your training departments regionalized?	No, all regions have similar SDLC procedures and take about the same time to market.	Some minor differences	Yes, some regions move faster than others	A		3	2	acceptable	less acceptable	Having separate training departments is challenging as delivery of a new app in a single org requires more coordination.	less acceptable		acceptable		Separate orgs with separate training groups per org is efficient.
Business	Organizational - Change Manag	Do you need to compensate for language?	No		Yes	A		3	2	acceptable	less acceptable			less acceptable		acceptable	Localization is simpler to manage in separate orgs
Business	Organizational - Change Manag	Do you need to compensate for local currency?	No		Yes	C		2	3	acceptable	less acceptable			less acceptable		acceptable	Localization is simpler to manage in separate orgs
Culture	Organizational - culture	Can your organizational culture manage the governance and negotiations necessary to support the strategy for CRM?	No	Somewhat	Yes	A		2	3	less acceptable	acceptable	acceptable		acceptable	acceptable	acceptable	Governance is more difficult to manage with a single org if too many players and negotiation needed.
Support	Organizational - culture	Change management per region versus overall change management?	Regions manage their own change management	Currently no centralized change management but on the road map.	Centralized change management team	C		0	2	less acceptable	acceptable	poor	Centralized change management preferred	good	acceptable	less acceptable	Regional change management preferred
Business	Organizational - culture	Is collaboration natural or do you find information needs to be segmented?	Cross-region collaboration occurs frequently and is natural.	Cross-region collaboration is infrequent, and may or may not be natural.	Cross-region collaboration almost never happens, or is not natural.	A		5	1	perfect	good	less acceptable		poor	less acceptable	perfect	Chatter collaboration is not unified across multiple orgs.
Culture	Organizational - culture	Do you want to empower markets to own their own businesses?	Yes, each market is empowered to drive, price, quote, sell, and service independently.		No each market is encouraged to drive, price, quote, sell, and service with a unified approach.	A		3	5	acceptable		perfect	Process and Data dependence	perfect		acceptable	Process and Data independence
